Re: Notice of Aerial Larval Control Application

In accordance with 333 CMR 13.04 (7) (a&b), please consider this as notification of the pending spring (summer if needed) aerial application targeting mosquito larvae in the larger wetlands within Bristol County.

The Bristol County Mosquito Control Project will be conducting aerial applications in 2020 between the hours of 4:00 a.m. to 9:00 p.m. as conditions permit. Applications will be conducted over specific large wetlands in the town(s) of: Acushnet, Easton, Freetown, New Bedford, Raynham, Rehoboth and Taunton in order to reduce the number of mosquito larvae. The insecticides to be used will be one or more of the following: VectoBac® G (EPA Reg. #73049-10), VectoBac® 12AS (EPA Reg. #73049-38) VectoLex® WDG (EPA Reg. #73049-57), VectoMax® CG (EPA Reg. #73049-429) or Altosid P35 (EPA Reg. #89459-95). Only mosquito breeding sites will be treated and no application will take place over residences. For further information, contact Bristol County Mosquito Control Project at 508-823-5253.

This legal notice was placed in the Taunton Daily Gazette and New Bedford Standard Times on Thursday, February 13, 2020.

Respectfully submitted,

Priscilla Matton
