

IT'S NOT TOO LATE!

Get your flu vaccine.

As long as flu viruses are circulating, it's not too late to get vaccinated.

A yearly flu vaccine is recommended for everyone 6 months and older.

Vaccination is especially important for protecting people at high risk of serious flu complications, including:

- **young children**
- **pregnant women**
- **adults 65 years and older**
- **anyone with chronic health conditions like asthma, diabetes, or heart disease.**
