## DEPARTMENT OF PUBLIC UTILITIES

### NOTICE OF FILING AND REQUEST FOR COMMENTS

D.P.U. 23-41

May 12, 2023

Petition of NSTAR Electric Company, d/b/a Eversource Energy, for Approval of its 2023 Energy Efficiency Surcharges for effect July 1, 2023.

On May 1, 2023, NSTAR Electric Company, d/b/a Eversource Energy ("Company"), filed with the Department of Public Utilities ("Department") a petition seeking approval of its 2023 Energy Efficiency Surcharges ("EES"), effective July 1, 2023. The Department docketed the Company's petition as D.P.U. 23-41.

An EES collects additional funds for approved energy efficiency programs when the cost of implementing those programs exceeds other funding sources. See G.L. c. 25, § 19(a). The proposed EES are designed to: (1) collect costs associated with the Company's 2023 energy efficiency program implementation in excess of other funding sources; and (2) reconcile expenses and revenues from the previous year's program implementation.

In compliance with the Department's directives in NSTAR Electric Company, D.P.U. 22-22, at 469 (2022), the Company's proposed 2023 EES incorporate a revised calculation method. In particular, the Company previously calculated a separate EES for residential customers and low-income residential customers. The revised EES calculation method allocates low-income energy efficiency program costs between a single, combined residential/low-income sector and the commercial and industrial ("C&I") sector. D.P.U. 22-22, at 469. As a result, the Company will now calculate a single EES for residential customers, including low-income residential customers.

Low-income residential customers will no longer pay a separate low-income EES; however, they will continue to receive a discount on their total electric bill. In part to offset future bill impacts from the change in EES calculation method, the Department approved an increase in NSTAR Electric's total bill discount for low-income residential customers from 36 percent to 42 percent. D.P.U. 22-22, at 470. That change took effect January 1, 2023, six months prior to the implementation of the new EES calculation method, and resulted in an additional monthly decrease to a typical low-income customer's bill of approximately \$12 in the eastern Massachusetts service territory and approximately \$13 in the western Massachusetts service territory. See D.P.U. 22-22, at 470-471; see also Compliance Exhibit J (Exh. ES-BILLS-1).

The Company proposes the following revised EES for effect July 1, 2023:

(1) 2.084 cents per kilowatt-hour (“kWh”) for residential customers, including low-income residential customers; and (2) 0.651 cents per kWh for commercial and industrial (“C&I”) customers. If the Department approves the 2023 EES as proposed, a typical residential customer (R-1) in the eastern Massachusetts service territory using 600 kWh of electricity per month will experience a monthly bill increase of \$0.48 (or approximately 0.2 percent). A typical residential customer (R-1) in the western Massachusetts service territory using 600 kWh of electricity per month will experience a monthly bill increase of \$0.60 (or approximately 0.3 percent). A typical low-income residential (R-2) customer in the eastern Massachusetts service territory using 600 kWh of electricity per month will experience a monthly bill increase of \$5.93 (or approximately 4.2 percent). A typical low-income residential (R-2) customer in the western Massachusetts service territory using 600 kWh of electricity per month will experience a monthly bill increase of \$5.94 (or approximately 4.7 percent). C&I customers will experience a monthly bill impact ranging from 0.0 percent to a decrease of 1.0 percent. For specific bill impacts, please contact the Company as shown below.

Any person interested in commenting on this matter may submit written comments no later than the close of business (5:00 p.m.) on **Friday, June 2, 2023**.
