**ARTICLE 2:** To see if the town will put forth legislation to establish the Freetown Lakeville Lake District in the Towns of Lakeville/Freetown. The District's purpose is to use sustainable and appropriate environmental practices to encourage biodiversity in the plant and animal communities that use the lakes in the District while controlling nuisance or damaging species in Long Pond, take appropriate action to protect and maintain integrity of the water quality of the pond so as to protect public and private water supplies, or take other action relative thereto. We understand that in carrying out the purpose of the District, an assessment fee shall be collected from Town residents abutting and/or having deeded access to Long Pond on an annual basis. Without the Lake District, Long Pond and associated facilities will experience problems of declining resource use and deficiencies of environmental control that threaten the ecological, economical, public safety and health, and recreational values of these bodies of water within the District and subsequently the Assawompset and Nemasket River watershed area.
